DETAILED ACTION

This office action is a response to Applicant's response submitted July 9, 2007, wherein a statement that the subject matter contained in Rydgren et al. (US 2005/0000391, PCT filed November 26, 2002) and the present application were, at the time the invention of the present application was made, owned by Akzo Nobel nv.

It is acknowledged that this application is a national stage entry of International Application No. PCT/SE04/00041, filed January 16, 2004 and claims priority to Swedish Application No. 0300235-9, filed January 31, 2006.

Claims 1-12 are pending in this application and are examined on the merits herein.

Applicant's statement regarding the 103(a) rejections of claims 1-4 and 6-12 under U.S.C. 103(a) over Rydgren et al. (US 2005/0000391, PCT filed November 26, 2002), that at the time the invention of the instant application was made, the instant application and Rydgren et al. (US 2005/0000391, PCT filed November 26, 2002), were owned by the same person or subject to an obligation of assignment to the same person, Akzo Nobel nv, is found persuasive. See MPEP § 706.02(k) and § 706.02(l). Therefore, the rejections of claims 1-4 and 6-12 have been withdrawn.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The claimed compounds, compositions, and methods of preparing the same are adequately described in the specification in such a way as to enable one skilled in the art to practice the invention. Examples 1-6 and Table 1, found on pages 7-10 of the specification, illustrate the preparation of cellulose ethers and having the claimed degrees of substitution and properties. Example 7 and Tables 2-4, found on pages 10-13 of the specification, illustrate paint compositions comprising the claimed cellulose ethers.

The reference relied upon in the rejections made in the office action dated March 9, 2007, Rydgren et al. (US 2005/0000391), is unavailable as a reference because the subject matter contained therein was commonly owned at the time the present invention was made. The closest prior art other than the Rydgren reference, Berglund et al. (US 2005/0176951, PCT filed November 26, 2002, also assigned to Akzo Nobel Inc.), discloses methyl ethyl hydroxyethyl cellulose ethers but not those ethers having the claimed substitutions and properties, nor methods of making the same.

Accordingly, applicant's response submitted July 9, 2007 is sufficient to remove all rejections made in the prior office action as discussed above and to place the application in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
